

SCREEN COLORS – issued 07.06.18

There has been a recent change in the way our supplier sells some of the fabrics we have been offering for custom shade screens. This applies to Twitchell's Textilene fabrics that we use for a number of custom shade screen colors.

Twitchell will no longer offer cut yardage on any fabrics above 96" wide. Since we use fabric that is 120" wide almost exclusively to minimize seams, we will begin stocking additional colors that will give your customers a broad tonal range from which to choose. Naturally, any custom color is available to your customer, it just means the whole roll needs to be purchased. This may not be cost effective for a one or two screen project but would balance out on a larger project that would use the whole roll.

Fenetex's Standard Shade Fabrics will be (you can view these on Twitchell's web site until we get ours updated):

Nano 95, Black
Nano 95, Charcoal
Nano 95, Tobacco
Nano 95, Bone
Nano 55 – Black Insect 17/17

From Twitchell: "TEXTILENE® nano™95 is a durable, yet lightweight synthetic fabric. It is lighter, finer and thinner with the same technical qualities as the original TEXTILENE®. TEXTILENE® nano™95 is excellent for outdoor use and can reduce energy costs while blocking up to 95% of the sun's harmful rays."

Our Standard Insect Screen is unaffected by this change, though other Insect Screen densities will no longer be available as cut yardage.

Polypropylene: black & black/tan – removable panels only

Omegatex: black, bone/white, black/tan – retractable screens only
(black std. – others are + \$1 per sf)

Track Colors: Adjustable jamb & face mount tracks – white/beige/bronze/black
Hurricane track – white, bronze
Fenetex does not powder coat.

NOTE !!!!! Adjustable face mount track has a trim cover, same general color as track. The track and trim cover are manufactured by two different suppliers, so there can be a color difference. Ask for samples of each.

Stock Colors subject to change with notice.
