COMMERCIAL

Insect Screens

Clear Vinyl Weather Curtains

Shade Screens

Hurricane Screens

Dual Screens

### The Fenetex Difference

#### **Fenetex Screens are Strong**

Our commercial screens share the same type of end retention system we originally developed for Fenetex hurricane screens. Zipper-based screens are notorious for blowing out; we solved the problem.

#### **Fenetex Tracks are Adjustable**

We all want a screen that is as wrinkle-free as possible and operates smoothly. To balance these two goals, we designed a track that moves.
